2018 SPECIAL OFFERINGS

TO IMPROVE YOUR WASTEWATER PLANT

Become more energy efficient in 2018! Focus on Energy has several new offerings designed to improve the efficiency of your plant, saving you both time and money.

Focus on Energy has worked with the DNR to create new tools that will reduce your energy expenses Start with a **Wastewater Plant Energy Assessment** and utilize the suggestions provided by completing no-cost/low-cost projects. Reward your efforts with incentives for proven electric bill savings through **Wastewater Energy Management**. Move on to assess a specific project identified from your assessment with the **Project Assessment Incentive** process. Finally, consider investing in a **Capital Project** to save your facility energy for years to come.

	OFFERING	DESCRIPTION	INCENTIVE	PRE-APPROVAL	TRADE ALLY INVOLVEMENT
	Wastewater Plant Energy Assessment	Assessment will identify no-cost/low-cost and capital energy projects	90% of assessment cost up to $10,000	✓	Must work with a qualified WSP
	Wastewater Energy Management	Implement no-cost/ low-cost energy measures	$1 - $3/kWh/MG saved (for flows up to 5 MGD)	✓	None required
	Project Assessment Incentive	Detailed assessment of projects increasing energy efficiency	50% of assessment cost up to $7,500	✓	Recommend working with a registered Trade Ally
CAPITAL PROJECTS *	Enhanced Prescriptive Incentives	Incentives for one-for-one replacement measures such as lighting and HVAC equipment	20% bonus on all prescriptive incentives		Recommend working with a registered Trade Ally
CAPITAL PROJECTS *	Enhanced Custom Process Incentives	Incentives for custom process upgrades	$0.08/kWh; $150/kW saved per year	✓	Recommend working with a registered Trade Ally

*Coordinate with Focus on Energy early in your application process with the Clean Water Fund (CWF) to ensure maximum incentives and principal forgiveness opportunities are evaluated.

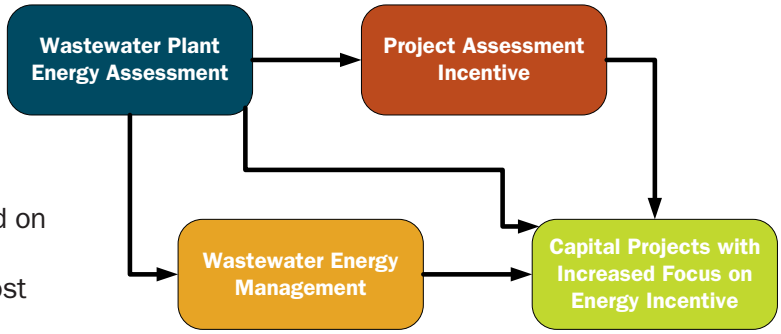
Wastewater Plant Energy Assessment

Take the first step and identify what needs to be done at your facility to save energy with the Wastewater Plant Energy Assessment (WWPEA). Qualified Wastewater Service Providers (WSPs) will evaluate your existing infrastructure, baseline your energy use and provide a list of no-cost/low-cost and capital improvement measures that can be completed at your plant. This is a great first step if you do not have a capital improvement plan or if it needs to be updated.

Incentive Available:

90% of assessment cost up to $10,000



Wastewater Energy Management

Implement the no-cost/low-cost improvement measures identified from the WWPEA. Incentives will be paid based on verified electric bill savings. This program is a one year opportunity to get financially rewarded for no-cost/low-cost plant improvements.

Incentive Available:

$1-$3/kWh/MG saved (for flows up to 5 MGD)

Project Assessment Incentive

This incentive is available to help make an identified improvement opportunity a reality. The Project Assessment Incentive (PAI) studies and develops a capital project that will increase energy efficiency. The PAI can be completed following a WWPEA to further develop a recommendation.

Incentive Available:

50% of assessment cost up to $7,500

Capital Projects

When a project has been selected, work with your Energy Advisor to identify incentive opportunities. These projects can be identified from the WWPEA, PAI, or they can be generated outside of those assessments.

Incentive Available:

20% bonus on all prescriptive incentives

$0.08/kWh; $150 kW saved per year

Follow these steps to get started:

1. Consult your Energy Advisor to maximize your plant's energy efficiency strategy. Visit focusonenergy.com/EA-map to find one in your area.
2. Work with your Energy Advisor to obtain pre-approval prior to starting (if required).
3. Work with registered Wastewater Service Providers and Trade Allies to ensure you are selecting offerings that allow for the most energy savings.
4. Start your energy efficiency journey!

REDUCING ENERGY WASTE ACROSS WISCONSIN

Focus on Energy, Wisconsin utilities' statewide program for energy efficiency and renewable energy, helps eligible residents and businesses save energy and money while protecting the environment. Focus on Energy information, resources and financial incentives help to implement energy efficiency and renewable energy projects that otherwise would not be completed.
