

This is not an application for an incentive. Use this form to request additions to the Pre-Qualified Equipment List. It is a participating contractor's responsibility to ensure the equipment installed is qualified to receive an incentive. Focus on Energy cannot and will not provide an incentive for non-qualified equipment for any reason.

If the model you plan to sell is not on a pre-qualified list, but meets the eligibility criteria, please pre-qualify it by completing this form and emailing it to homerewards@focusonenergy.com. Please include as much supporting documentation (technical specification sheets, manufacturer information sheets, etc.) as possible to ensure the equipment's qualification. This will avoid promising a customer an incentive for equipment that may not be eligible. **Submitting this form does not guarantee equipment will be qualified. We recommend waiting for program verification prior to installing equipment.**

If you are a customer and wish to request pre-qualification of a model you are interested in purchasing, you may use this form. Please note, equipment must be installed by a licensed contractor to qualify for incentives. **Questions?** Contact us at 800.762.7077.
