

2019 RENEWABLE ENERGY SOLAR ELECTRIC (PV) INCENTIVE APPLICATION

Complete this application for products purchased and installed in 2019. This application and incentives are effective March 1, 2019. Please return the signed, completed application and copy of sales invoice postmarked within 60 days of installation.

FOCUS ON ENERGY® incentives are limited and are subject to change without notice. Allow 8–10 weeks for processing. Visit focusonenergy.com/terms for program terms and conditions.

Step 1: Complete your installation

Work with your contractor to schedule and complete your solar electric (PV) installation.

Step 2: Complete your application

Please fill out all fields unless otherwise directed, and make sure to sign your application. Incomplete or missing information will delay processing.

What you'll need:

- A copy of your invoice for installation of a solar electric (PV) system.
- Photos of:
 - The solar array
 - The front of building associated with address
 - The array with building in the background (if not possible, a diagram of system relative to the building).

Step 3: Submit paperwork

Submit your application **within 60 days of the equipment installation** along with supporting documentation to Focus on Energy at the address below. Please allow 8–10 weeks for processing and retain a copy for your records.

Solar electric (PV) system requirements

System-specific solar electric (PV) requirements

- Eligible models must be selected from the qualified product list found at gosolarcalifornia.org/equipment/pv_modules.php.
- Eligible inverters must be selected from the qualified product list found at gosolarcalifornia.org/equipment/inverters.php.
- System must be installed within 90 degrees of due south. Systems installed between 45 and 90 degrees of due south are subject to a reduced incentive cap.
- System must be installed with a panel tilt between 10–50 degrees.
- System must be installed with 10 percent or less obstacle shading, per an industry accepted tool.
- System must have a minimum of a five-year warranty.
- Incentive cannot exceed cost to customer.
- Both modules (panels) and inverter must be installed to receive an incentive.
- If the project site is serviced by a participating Focus on Energy utility and uses a non-residential rate, the project site does not have to be owned by the applicant. The project/system equipment, however, must be owned by the applicant in order to qualify and confirmation of this ownership should be provided. System ownership must revert to the property owner after a specified period of time, not to exceed 25 years.
- In order to receive a commercial incentive the system must be connected through a non-residential rate meter.
- System must be purchased new. Resale equipment, new parts installed in existing equipment, or equipment that is rebuilt, rented, received from insurance claims, received from a warranty, or won as a prize does not qualify.
- Focus on Energy will only pay one incentive for each technology per site per calendar year. Incentives paid on this application cannot be claimed on another Focus on Energy application. Similarly, incentives can only be paid to one person or entity.
- System must be installed by a qualified contractor.

Meter Type: Residential Commercial

Calculate your incentive amount Incentive is paid to the individual listed above as a cash-back incentive

Residential: 1–3 unit (owner-occupied or rental). Incentive is 12% of installed cost, not to exceed \$2,000 for systems within 45 degrees of due south. A maximum incentive of \$1,500 is available for systems installed between 45 and 90 degrees of due south. For residential installations in specific, eligible ZIP codes the incentive cap is doubled to \$4000 or \$3000 respectively. For the list of eligible ZIP codes see focusonenergy.com/renewables.

Solar Electric System Cost: \$ _____ x 0.12 = \$ _____ incentive (maximum \$2,000)

Example: Solar Electric System Cost: \$13,000 x 0.12 = \$1,560 incentive

Business: Any property outside a 1–3 unit home. Incentive is 12% of installed cost, not to exceed \$4,000 for systems within 45 degrees of due south. A maximum incentive of \$3,000 is available for systems installed between 45 and 90 degrees of due south.

Solar Electric System Cost: \$ _____ x 0.12 = \$ _____ incentive (maximum \$4,000)

Example: Solar Electric System Cost: \$40,000 x 0.12 = \$4,000 (maximum incentive)
