

RENEWABLE ENERGY GEOTHERMAL RESERVATION APPLICATION

Complete this application to reserve an incentive for a qualified ground source heat pump or geothermal system purchased and installed between January 1, 2018 and June 30, 2018. Focus on Energy incentives are limited and are subject to change without notice. Incomplete applications will delay processing and prioritization of the reservation funds. Visit focusonenergy.com/terms for program terms and conditions.

Step 1: Confirm your equipment eligibility

To verify that your equipment is eligible for Focus on Energy's geothermal incentive, review requirements on back of this page and provide the brand name and model number for our review here:

Expected Project Completion Date:	
Brand Name:	Model Number:
<input type="checkbox"/> Incentive for system with auxiliary electric resistance/ LP. (\$650)	<input type="checkbox"/> Incentive for system with auxiliary natural gas. (\$650)

Step 2: Complete your application

Please fill out all fields unless otherwise directed, and make sure to sign your application. Incomplete or missing information will delay processing.

WHAT YOU'LL NEED:

- A copy of your signed proposal or invoice for installation of a geothermal system.

Step 3: Submit paperwork

Submit your application prior to equipment installation along with supporting documentation to Focus on Energy. Please retain a copy for your records.

Focus on Energy – Renewable Incentives
3113 W. Beltline Highway, Suite 100
Madison, WI 53713

Email: renewables@focusonenergy.com

Fax: 888.627.0938

For questions, call: 855.339.8866

Step 4: Confirm reservation

Focus on Energy will send your reservation approval notification to the email listed on this application within 15 business days. If no email is provided, you will not be notified of your reservation status. A copy of this notice will be sent to your Trade Ally/Contractor as well.

Step 5: Complete installation and submit incentive application

Complete and submit renewable energy incentive application available on focusonenergy.com within **90 days of reservation approval**.

Geothermal Heat Pump System Requirements

Geothermal Heat Pump System with Auxiliary Electric Resistance/LP: \$650

- Limited to customers of participating electric utilities who do not have access to natural gas service.

Geothermal Heat Pump System with Auxiliary Natural Gas: \$650

- Limited to customers of participating electric and natural gas utilities.
- If natural gas is available in the area, either a natural gas auxiliary/emergency heat must be used or no auxiliary/emergency heat may be used.

Geothermal Heat Pump Requirements:

- System must have a coefficient of performance (COP) equal to or greater than 3.5 based on the efficiency of a closed-loop system.
- System must have an energy efficiency ratio (EER) rating equal to or greater than 15.
- System must have a multi-stage compressor.
- Large commercial (i.e. three-phase) units are ineligible under this application. Contact Focus on Energy for more information.
- The air handler must have an electronically commutated motor (ECM). An ECM is sometimes referred to as a variable-speed, constant-airflow, constant-torque, electronically efficient (EEM) or X-13 motor. A permanent split capacitor motor (PSC), single- or multi-speed, does not qualify. A Pre-Qualified Equipment List is available at focusonenergy.com/residential/renewable/geothermal-heat-pumps.
- Installed systems must include an air cooling option.
- System must have a minimum of a five-year warranty.
- System must be the primary heating and cooling source for the site.
