Clean energy for Wisconsin

If you’ve already put in the work to make your home or business as energy efficient as possible, now is the perfect time to take an even more rewarding step. FOCUS ON ENERGY® offers cash incentives for qualified solar electric systems.

Power your home or business with solar

Solar electric systems, also known as photovoltaic (PV) systems, use sunlight to generate electricity. To capture sunlight, solar panels are strategically placed on roofs or ground mounted to maximize exposure to the sun. Systems are silent, very reliable and require little ongoing maintenance.

And yes—Wisconsin really does get enough sun, even in winter, to produce energy and reduce electricity bills for your home or business!

Getting started

There are a few things to consider before installing a PV system:

- Electrical use at the site
- Shading
- Roof age and condition, as well as the direction of your roof if considering a roof mount system

Contact an installer to obtain bids and site assessments. Be sure to ask about the local permitting and interconnect processes, utility rates and net metering policy, and local references.

For additional resources and tips, see energy.gov/energysaver/planning-home-solar-electric-system.

Efficiency first

To optimize energy savings and correctly size your renewable energy system, Focus on Energy recommends that you maximize the efficiency of your home or business before installing a renewable system. Consider starting with an energy assessment, or save on efficiency improvements such as new heating and cooling equipment, or insulation and air sealing. Learn more at focusonenergy.com.

<td>$50,000</td>
</tr>
</tbody>
</table>

*Solar PV systems 500 kW and above will be capped at the maximum incentive of $50,000.

Additional incentives are available for agricultural producers. Business customers classified as agricultural producers will qualify for an incentive match up to $10,000. Agricultural producers are defined as “businesses engaged in the production of grain, livestock, milk, poultry, fruits, vegetables, bees and honey, fish, shellfish, or other common agricultural products including greenhouses.”

HOW TO PARTICIPATE

1. Contact a Trade Ally contractor. They will help you size a solar PV system that’s right for your home or business, estimate energy savings, calculate your incentive, and provide a quote. Find a Trade Ally contractor at focusonenergy.com/findatradeally.

2. Visit focusonenergy.com/renewable to confirm 2020 incentive funds are still available.

3. Work with your Trade Ally contractor to size and price a system, and reserve your solar PV incentive.

4. Have your Trade Ally contractor complete the system installation.

5. After your system has been installed and placed into operation, submit your incentive application to claim your incentive.
