

2022 SOLAR ELECTRIC INCENTIVE APPLICATION

Scan to go to
online application

Complete this application for systems purchased and placed into operation in 2022.

Step 1: Complete Your Installation

Work with your contractor to schedule and complete your solar electric, also known as photovoltaic (PV), installation. System must be operational and interconnected to submit the incentive application.

It is strongly recommended that the online reservation be completed prior to installation to hold your incentive.

Looking for the reservation form?
Go to focusenergy.com/PVreservation.

Step 2: Complete Your Application

Incomplete or missing information will delay processing.

Required documentation:

- A copy of your invoice for installation of a solar electric system.
- Photos of:
 - The entire installed solar array. This may be multiple pictures, but must clearly demonstrate the number of modules installed. If necessary, a diagram of the system should also be included.
 - The front of building associated with address.
 - The array with building in the background (if not possible, a diagram of system relative to the building).

Step 3: Submit Paperwork

Submit your application **within 60 days** of the system being placed into operation, along with supporting documentation.

FOCUS ON ENERGY® incentives are limited and are subject to change without notice. Allow 8-10 weeks for processing. Visit focusenergy.com/terms for terms and conditions.

Solar Electric System Requirements

System-Specific Solar Electric Requirements

- Eligible models must be selected from the qualified PV module product list found at energy.ca.gov/programs-and-topics/programs/solar-equipment-lists.
- Eligible inverters must be selected from the qualified Grid support inverters product list found at energy.ca.gov/programs-and-topics/programs/solar-equipment-lists.
- System must be installed with a panel tilt between 5-50 degrees.
- System must be installed within 135 degrees of due South.
- System capacity must be 0.5 kWDC or greater.
- System must be installed with 10% or less obstacle shading, per an industry accepted tool.
- System must have a minimum of a five-year warranty.
- Incentive cannot exceed cost to customer.
- In order to receive a commercial incentive, the system must be connected through a non-residential rate meter.
- System must be purchased new. Resale equipment, new parts installed in existing equipment, or equipment that is rebuilt, rented, received from insurance claims, received from a warranty, or won as a prize does not qualify.
- Focus on Energy will only pay one incentive per site (residential) or meter (non-residential) per calendar year. Incentives paid on this application cannot be claimed on another Focus on Energy application. Similarly, incentives can only be paid to one person or entity.
- System must be installed by a qualified contractor.

Residential Customer Solar Electric Incentives

Installation Type	Incentive
Single Family Home	\$500 per system

- Residential rural customers will receive a \$500 bonus for installing a system. See eligible rural ZIP code list at focusonenergy.com/renewablefunding to confirm eligibility.

Business Customer Solar Electric Incentives

System Size in kW (DC)	Incentive	Maximum Incentive
Up to 5 kW	\$200 per kW	\$1,000
5-10 kW	\$1,000 + \$150 per kW above 5 kW	\$1,750
10-100 kW	\$1,750 + \$125 per kW above 10 kW	\$13,000
100-300 kW	\$13,000 + \$100 per kW above 100 kW	\$33,000
300-500 kW*	\$33,000 + \$85 per kW above 300 kW	\$50,000

*Solar PV systems 500 kW and above will be capped at the maximum incentive of \$50,000.

- Business customers classified as agricultural producers will qualify for an **incentive match up to \$10,000**. Agricultural producers are defined as “businesses engaged in the production of grain, livestock, milk, poultry, fruits, vegetables, bees and honey, fish, shellfish, or other common agricultural products including greenhouses.”

Special Sector Solar Electric Incentives

System Size in kW (DC)	Incentive	Maximum Incentive
Up to 5 kW	\$1,000	\$5,000
5-10 kW	\$5,000 + \$700 per kW above 5 kW	\$8,500
10-100 kW	\$8,500 + \$250 per kW above 10 kW	\$31,000
100-300 kW	\$31,000 + \$150 per kW above 100 kW	\$61,000
300-500 kW*	\$61,000 + \$100 per kW above 300 kW	\$81,000

*Solar PV systems 500 kW and above will be capped at the maximum incentive of \$81,000.

- Nonprofits, schools, government, and Tribal Nations can qualify for an incentive of up to \$81,000 for installing solar.
- This incentive helps organizations that do not qualify for the solar investment tax credit (ITC) to offset the cost of installing solar electric systems.
